Also Hamdani Co. Encouraging farmers and educate them on the right healthy agricultural methods which raise quality, increase production, raise the national economy, revive the economy and compete with international markets. Our company is considered as one of the establishers of "Yemen Mocha Coffee Association". Which has been newly founded in the beginning of the year 2007. This association deals with encouraging and supporting coffee farmers in all the areas of the republic . It maintains the quality and reputation of the Yemeni mocha coffee against other foreign companies exploiting the name of " Mocha" for marketing their non -Yemen products which have not any relations to the Yemeni coffee .

YEMEN MOCHA COFFEE

Yemen is reputed from ancient time by planting Mocha coffee Which is the best type of coffee in the world . Yemen is the original place for coffee in the world. Yemeni coffee is distinguished with it's unique flavor and fashionable taste which is not found in any other coffee. It does not need any definition, because it internationally reputed since ancient times and called Yemen Mocha as related to mocha reputed port where the coffee was exported through it in that time. And it's still known by this name in many world countries up to now .

APPROVED METHODS FOR HARVESTING THE COFFEE CROP

Harvesting of coffee in Yemen is prevailing in traditional methods . farmers often harvest the crop in stages whereas the crop is harvested in a way that permits keeping it's good quality and competition, when ever the color of the crop due to bright red color the farmer starts to harvest it . The color will change into light red until it ripens and the color changes to violet or dark gray for cutting by the farmer , in the case it is immediately harvested .

COFFEE DRYING

coffee drying is the most complicated process of preparing the harvest for marketing ,so it requires more care from the farmers to ensure the required quantity and flavor .After the collection of the harvest it will be exposed to the sunlight and placed in dry areas for 10 days to two weeks.

REMOVING PEELS AND PACKING

Peeling of the coffee crop is representing the last step for marketing coffee. This process is to automatically removing the shell from the green coffee. Then to get rid of any uninterested parts from the green coffee so as to be pure 100% . Then it will be marketed and exported .

EXPORTING

We are exporting the best Yemeni mocha coffee to more than 30 countries around the world.
